

Let us be the support you need, to give your child the life they deserve.

When a child is born with severe disabilities or complex medical problems, parents often face one of the most difficult decisions of their lives – choosing to care for their child at home or seeking a residential program equipped to handle their many needs. In some instances, there is no choice – the child’s physical and emotional needs can only be met through support from a specialized care facility.

At ArchCare at Mother Cabrini Hospital, we care for these children and adults that have the most complex special needs. We offer comprehensive medical treatment and skilled nursing care in a state-of-the-art, clean, warm, and safe hospital environment staffed with caring specialized medical professionals.

Our top priority is to give your child the highest quality of care, giving you the comfort and peace of mind you need.

Caring family support.

Our approach is centered on the family, ensuring that you feel comfortable and at peace entrusting your child in our care.

Providing the best quality of life for our residents includes forming vital partnerships between the staff and families. We are here to listen, develop a plan of care with you, and encourage active participation and on-going communication throughout your child's stay.

A home away from home.

Our beautiful new rooms, gathering spaces, and family lounges act as a home away from home for our residents and their families. All rooms are cheerfully decorated, and personalized photos and mementos create a home-like atmosphere.

Our loving and skilled staff are the backbone of creating this personal and comfortable home, all while focusing on delivering expert medical care.

ArchCare at Mother Cabrini Hospital

SPECIALTY HOSPITAL FOR
CHILDREN AND ADULTS AT
TERENCE CARDINAL COOKE
HEALTH CARE CENTER

A forever home for those with the
most complex special needs.*

 **archcare**
at Terence Cardinal Cooke
Health Care Center

A state-of-the-art facility.

Funded by the Mother Cabrini Foundation and Catholic Health Care Foundation, our 72-bed specialized care facility is fashioned with state-of-the-art medical equipment and designed to keep your loved one comfortable and safe with 24/hour supervision. We are certified and regulated by the Office of Persons with Developmental Disabilities (OPWDD), who is responsible for coordinating services for New Yorkers with developmental disabilities, ensuring the highest level of care for our residents.

Thoughtfully designed spaces.

- Each room contains a fully equipped nursing station, with supplies at the ready allowing for fast, easy, and consistent response to critical care needs.
- Classrooms and recreational spaces are modern and beautiful spaces that offer stimulating and comfortable environments for our residents.
- Sensory lights are positioned in all bedrooms and gathering spaces to help calm or increase stimulation when appropriate.

Advanced technology for peace of mind.

- Bedside monitoring equipment provides alerts for when there is a change in condition necessitating medical or nursing intervention.
- A Certified Infection Preventionist oversees all aspects of infection control.
- All needed equipment to care for the residents is readily available in all common areas allowing for ease of visitation.
- Individualized temperature-controlled rooms for personal comfort.

“As I see it, the mission is this: loving other human beings—wherever they are in the world, and letting them know that there is a God who loves them unconditionally, now, as they are.”

— Saint Frances
Xavier Cabrini
